THE  
21ST CENTURY  
TRADITIONAL  
SERIES

## CENTURION<sup>™</sup> TRADITIONAL

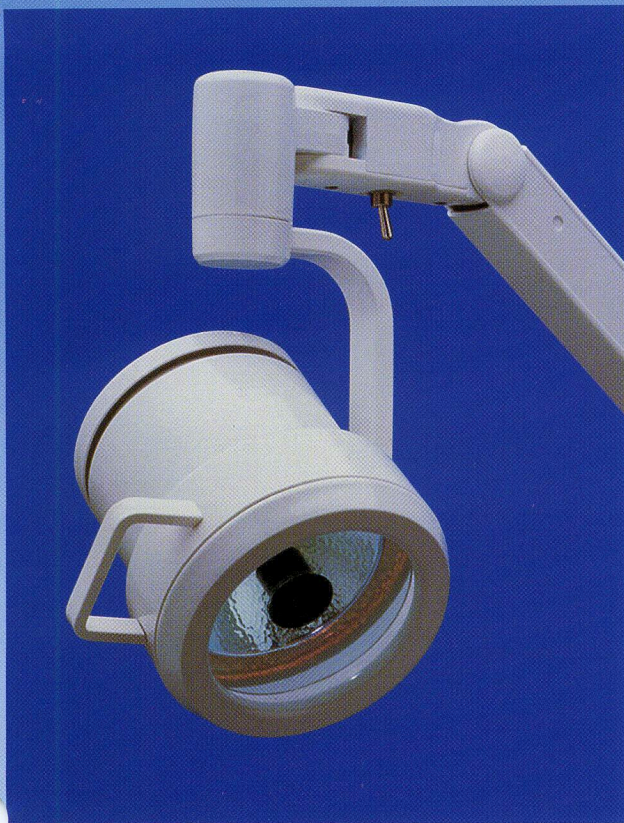

THE CENTURION is a revolutionary surgery and examination light which offers the performance and features found on higher-priced surgery lights. THE CENTURION includes a highly efficient single reflector design, assuring an optimal shadow-free environment, and the 21ST CENTURY TRADITIONAL SERIES' exclusive CENTRA<sup>™</sup> arm delivery system.

## CENTURA<sup>™</sup> TRADITIONAL

This full-featured spotlight gives exceptional performance and versatility in a truly unique design. Used independently or in support of other lighting equipment, the clean, streamlined CENTURA creates a tightly focused, high intensity light pattern. The CENTURA also features the 21ST CENTURY SERIES' exclusive CENTRA<sup>™</sup> arm delivery system and an optional built-in fiber-optic light generator for connection of fiber optic headlamps or instruments.

## **CENTRY**<sup>™</sup> TRADITIONAL

The compact, economical CENTRY is an ideal diagnostic/exam light. Utilizing a unique 5" dichroic glass reflector, the CENTRY produces a large pattern of light for a wide variety of applications. Like all 21ST CENTURY lights, it features the exclusive CENTRA<sup>™</sup> arm delivery system.

## The 21st Century Traditional Series

has become a standard of excellence for medical lighting. This handsome, modular family of surgery, examination and spot lighting provides a full array of standard features with arm mobility normally found in far more expensive lighting.

Modular mounting allows for complete flexibility of mounting options. High quality, pleasing aesthetics and excellent value — the hallmarks of the 21ST

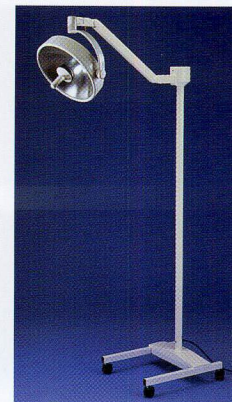

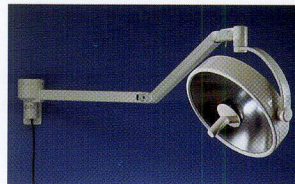

CENTURY TRADITIONAL SERIES.

WHERE ILLUMINATION IS DEFINED

## CENTURION™ TRADITIONAL

- Prefocused 6" (152 mm) spot at a distance of 36" (914mm) from lamphead, providing homogenous light with 4,000 ft. candles (43,000 lux) and color temperature of approx. 4000° Kelvin
- Easily replaceable, low cost, long life 12 Volt/90 Watt halogen bulb
- 15" (380 mm) diameter elliptical reflector
- IR absorbing, color-correcting glass cylinder
- 28" (711 mm) articulating arm with integral compression spring
- Arm rotates 40° up and down from horizontal plane
- Lamp head and arm both rotate 540°
- Removable sterilizable handle
- Additional positioning handle mounted on perimeter
- Available in floor, wall, fixed ceiling or ChuttleTrak™ mountings

## CENTURA™ TRADITIONAL

- Continuously adjustable spot from 3" (76 mm) to 16" (406 mm) diameter, providing homogenous light with 2,000 ft. candles (21,500 lux) at a distance of 36" (914mm) and a color temperature of 3,500° Kelvin
- Easily replaceable 20 Volt/150 Watt bulb with integral dichroic reflector
- IR absorbing, color-correcting glass filter
- Mechanical dimmer provides constant purity of light without affecting color temperature
- 28" (711 mm) articulating arm with integral compression spring
- Arm rotates 40° up and down from horizontal plane
- Lamp head and arm both rotate 540°
- Positioning handle, or optional sterilizable handle, mounted on perimeter
- Available with an integral fiber-optic light generator
- Available in floor, wall, fixed ceiling and ChuttleTrak™ mountings

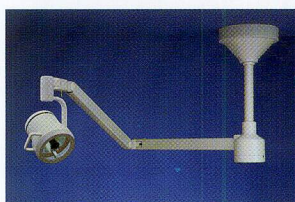

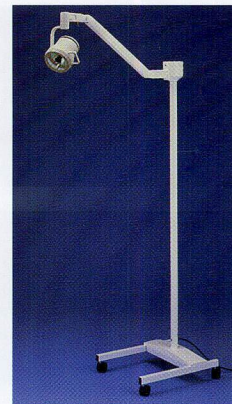

## CENTURA F.O.

- Optional models with built-in fiber optic light source
- Includes all features of the standard Centura, plus single ACMI-type fiber optic port for connection of fiber optic headlamp or instruments

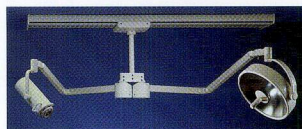

## CENTRY™ TRADITIONAL

- Prefocused 6" (150 mm) spot at a distance of 36" (914 mm) from lamphead, providing homogenous light with 3000 ft. candles (32,280 lux) and color temperature of approx. 3500° Kelvin
- Easily replaceable, low cost, long life 12 Volt/75 Watt halogen bulb
- 5" (127 mm) multi-faceted glass dichroic reflector
- IR absorbing, color-correcting glass filter
- 28" (711 mm) articulating arm with integral compression spring
- Arm rotates 40° up and down from horizontal plane
- Lamp head and arm both rotate 540°
- Positioning handle, or optional sterilizable handle, mounted on perimeter
- Available in floor, wall, fixed ceiling and ChuttleTrak™ mountings

## CHUTTLETRAK™

- Available in single or dual trolley models that can accommodate up to 2 lights per trolley
- Standard track length of 70" (178 cm) with other lengths available upon request
- Finished in durable, high-gloss white coatings
- Quality of engineering provides for economic operation and an unparalleled value in the industry
