

SAFETY

Blades & Scalpels

DeRoyal

Safety Scalpel with Retractable Blade

Designed by a surgeon and a safety engineer the blade can be fully retracted using one hand. Safe and easy to open and close. Ribbed, slip-resistant finger grips ensure a secure hold in gloved hands. Comfort styling allows for a variety of hand positions during surgical cutting. Latex safe and sterile.

Futura

The New Thinking Safety

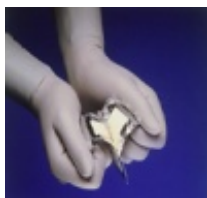

Futura Safety Scalpel

The Futura Safety Scalpel provides superior safety features and retraction technology. The user controls in-use or hidden position of blade via locking inset retraction feature. Hides blade in safety position thereby reducing accidental cuts. The device is well balanced, compact and completely disposable.

IV PRODUCTS

Becton Dickinson

BD Posiflow IV Access Products

BD Posiflow eliminates blood drawback into the catheter upon luer disconnect. Compatible for use with lipids and chemotherapy agents. Intuitive, easy-to-use and patient-friendly design. Low-priming volume, dead space. Straight, two-way fluid path. Flow rate capability to meet clinical needs. Flat swabable surface. Latex free. Contains no metallic materials.

BD InterLink Blunt Plastic Cannula

Designed for improved performance, the BD Blunt Plastic Cannula enhances the Interlink IV Access System. The BD Blunt Plastic Cannula is a truly universal cannula, and can be used with all types of split septum IV injection sites and vials designed for needleless access. It provides simplified access to the interlink injection site with smoother insertion, reduced penetration force, and greater fluid dispersion.

**The IN-ROOM System
Wall Enclosures and
Glove Boxes**

Sharps containers are
secured in a sturdy,
locked enclosure. All
cabinets are conveniently
keyed alike. Made with
sturdy ABS plastic for
extra protection and long
lasting use. Easily
monitor fills level
through viewing windows
on front and sides. Keep
gloves readily available
with optional Glove
Dispenser. Mounted Wall
enclosures secure sharps
containers, free up
counter space and help
prevent access to contents
in high traffic areas.
Hospital personnel can
view contents, but
unsightly items are not
fully apparent to patients
and visitors. These sturdy
enclosures are made with
ABS Plastic-the same
material used in football
helmets

Post Medical

Automatic Needle Disconnect Sharps Collector

The Automatic Needle
Disconnect (A.N.D.)
phlebotomy container
from Post medical is the
ideal system for safe
disposal of blood
collection needles, lancets
and butterflies. Molded of
durable, puncture-
resistant plastic, this
unit's compact size fits
easily into phlebotomy
trays. Separate A.N.D.
units are designed to
work with BD
Vacutainer, Sherwood
Monoject, Terumo,
Nissho, and Greiner
blood collection needles.
Simply push holder
downward with ONE
HAND – the blood
collection needle is
automatically unwound
and deposited safely into
the container. 24 per case
