- ECG Patient Cables

ECG Vacuum Electrode System VAC-100

Safety – Dependability – Efficiency

The ECG Vacuum Electrode System VAC-100 ideally completes each ECG and cardiopulmonary function testing system. Functionality, high reliability and user comfort distinguish this system.

The bracket with the suction electrodes is an extremely flexible unit suitable for any practice.

Features:

- Large volume pump with a high standby potential
- Microprocessor regulated control system monitors and saves the selected pressure levels
- Minimal pumping noise
- Leakage compensation
- Optimized baseline stability
- Electrode leads can easily be exchanged
