

Blood Pressure

HOLTER BR-102

24-hour Ambulatory Blood Pressure Measurement Holter BR-102
Probably the smallest ABPM in the world

Features:

- Weighs only 310 g
- Auscultatory or oscillometric method
- Very small
- Individual programmable circles and measurement periods
- Day/night limits
- Data transmission to PC

Blood Pressure Monitor BP-200

Non-invasive Stress Test Blood Pressure Monitor BP-200
Accuracy and performance for stress test BP measurement

Features:

- Especially designed for use with treadmill ergometers
- ECG triggered
- 3-D K-sound Analysis (DKA)
- RS-232 Interface Capability to SCHILLER ECG Systems (AT-10, CS-200, AT-110, PT-160)
- Real Time Wave Form Display
- BP-200 User Realtime Display
- Historical Tabular Data
- BP Readings initiated automatically or manually

Accessories

SPIROVIT Sensors

Pneumotach sensors – SPIROVIT SP-20/30/260 – reusable sensors

Features:

- Probably smallest sensors world-wide
- Lightweight and low cost
- Easily fits childrens hands
- Very easy to clean
- Most economical method of performing pulmonary function testing

Pneumotach sensors – SPIROVIT SP-150/160/250 with disposable flow sensors

Features:

- Probably smallest sensors world-wide
- Lightweight
- Easily fits childrens hands
- No cleaning – no risk of cross contamination due to unique sensor technology
- Best way for patient-after-patient testing
